

## Java

```
class Solution {  
    public int[] nextGreaterElements(int[] nums) {  
  
    }  
}
```

---

## JavaScript

```
/**  
 * @param {number[]} nums  
 * @return {number[]}  
 */  
var nextGreaterElements = function(nums) {  
  
};
```

---

## TypeScript

```
function nextGreaterElements(nums: number[]): number[] {  
  
};
```

---

## C++

```
class Solution {  
public:
```

```
vector<int> nextGreaterElements(vector<int>& nums) {  
    }  
};  
-----
```

**C#**

```
public class Solution {  
    public int[] NextGreaterElements(int[] nums) {  
    }  
}
```

-----
